(Activates Server)

Resting
State

The client sends a
request to the
history

Interpretive
State

The server finishes
processing the
request

Response
State

The server
compiles a proper
response and
sends it to the
client.

Resting State
The Server waits
for a request from
the client

Interpretive State
The server
interprets the
request of the client
and processes a
response

Response State
The server finishes
processing a
request and
prepares to send a
response back to
the client.
